

They are identified by the highly developed brain that confers advanced skills in abstract reasoning, articulate language, self-awareness, problem solving, and sapience. They are bipedal primates in having an erect carriage. They are skillful in handling objects with their hands.

Humans may also be described as social animals capable of showing sympathy with other beings, and living life with (inherent) values and ethics.

Word origin: from Latin *hūmānus*, of *homō* meaning "man".

# The Human Being

I wonder if I'm literary enough.

## author

a: one that originates or creates source <software authors> <film authors><the author of this crime>;

capitalized : god.

## user

"Electronic readers therefore shuttle between two modes of reading, or rather they learn to read in a way that combines verbal and picture reading. Their reading includes activating signs by typing and moving the cursor and then making symbolic sense of the motions of the motions that their movements produce."
